INSTA-STIK MP

INSTA-STIK MP (MultiPurpose) adhesive is gun applied, fast curing and low expansion. Quick, easy and clean to use, **INSTA-STIK MP adhesive** is ideal for fixing plasterboard, insulation board and most common building substrates. The amount of adhesive can be regulated through the trigger and screw at the back of the applying gun, and can be applied directly to the substrate.

BENEFITS

- **Quick & easy to use**
- **Lower overall job costs**
- **Increases insulation value**
- **Less sensitive to temperature**
 - > Too warm – Mortar dries too quickly and cracks
 - > Too cold – Mortar takes too long to cure
- **Will adhere to most common building materials**
 - > Extruded and expanded polystyrene, plaster and plaster boards, polyurethane and polyisocyanurate, metal, wood, concrete, bricks, stone, bituminous substrates, mineral wool, cork
- **Minimal expansion but gap fills uneven surfaces**

INSTA-STIK MP adhesive

INSTANT ADVANTAGES

- **NO heavy bags of dry wall adhesive**

Easy to handle and transport

1 can will go further than a 25kg bag

1 can will fix approximately 5
(1.2m x 2.4m) plasterboards (13m²)

- **NO preparation time, can ready for immediate use** = 30-35% time saving = cost saving

- **NO additional tools required**

- **NO water or mixing required**

- **NO waste or mess**, INSTA-STIK MP can be reused until empty

- **NO need to wait**, you can plaster 1 hour after application instead of having to come back the next day

- **NO secondary mechanical fixings normally required**

- **NO cold bridges**

As simple as

1 Shake 2 Click 3 Start

- 1 Shake the INSTA-STIK MP adhesive can vigorously for about 30 seconds.

- 2 Turn the INSTA-STIK MP adhesive can upside down and screw it onto the valve of the PU spray gun.

- 3 Spray beads of INSTA-STIK MP adhesive onto the substrate. Fix the substrate within 4 minutes of application and press firmly.

**Apply adhesive to wall
(or board)**

**Fills an uneven surface
yet fixes tight to the wall**

- Your health and safety are of primary importance so before starting installation ensure that your workplace is free of hazards and always wear protective gloves and eyewear.
- Surfaces, especially metal surfaces, must be free from oil and grease.
- Curing time of INSTA-STIK MP adhesive depends on temperature and humidity conditions. Therefore it is recommended to test the specific curing time before application. In dry climate conditions curing time might be reduced by increasing air humidity, e.g. spraying of water to the foam beads.
- For fire rated applications one mechanical fixing per board is required.
- The PU spray gun can be cleaned using Gun Cleaner
