## **DuPont™ Tyvek® UV Facade Tape** (upgraded formulation)

**Technical Datasheet** 

## **Product Description & Application**

Black single-sided acrylic tape with high UV resistance and excellent bonding properties. Even if designed for sealing DuPont™ Tyvek® UV Facade overlaps, penetrations and joints, Tyvek® UV Facade Tape is a universal high tack all weather UV resistant tape for stronger sealing of walls and roofs with excellent aging and outdoor performance.

## **Specifications**

| PROPERTY                    | VALUE                              |
|-----------------------------|------------------------------------|
| Stylename                   | 1312F                              |
| Base weight                 | ca. 390 gr/m² (without interliner) |
| Peel adhesion (DIN EN 1939) | ca. 25 N/25mm                      |
| Support fabric              | high UV-stabilized Polypropylene   |
| Temperature range           | from -40 °C to +100 °C             |

## **Features and Benefits**

- Product is designed for the building industry. DuPont™ Tyvek® UV Facade Tape has a high immediate tack and excellent adhesion onto Tyvek® UV Facade and a wide range of plastic materials (e.g. non-woven, film,..).
- Users must check that the Tyvek® UV Facade Tape is suitable for the support (adhesion, chemical compatibility, staining, ...).
- The resistance to ageing, water, humidity, environmental cycling and chemicals is excellent.
- The recommended application temperature is >-5 °C. The application should be done on a dry and clean surface (no dust, no grease, no solvent, ....).
- Conditions: store rolls in their initial packaging, with their long edge vertical, in a clean and dry place.
- Storage temperature between +10 °C & +30 °C.
